

# Risk Assessment in the work on Escalators during maintenance operations

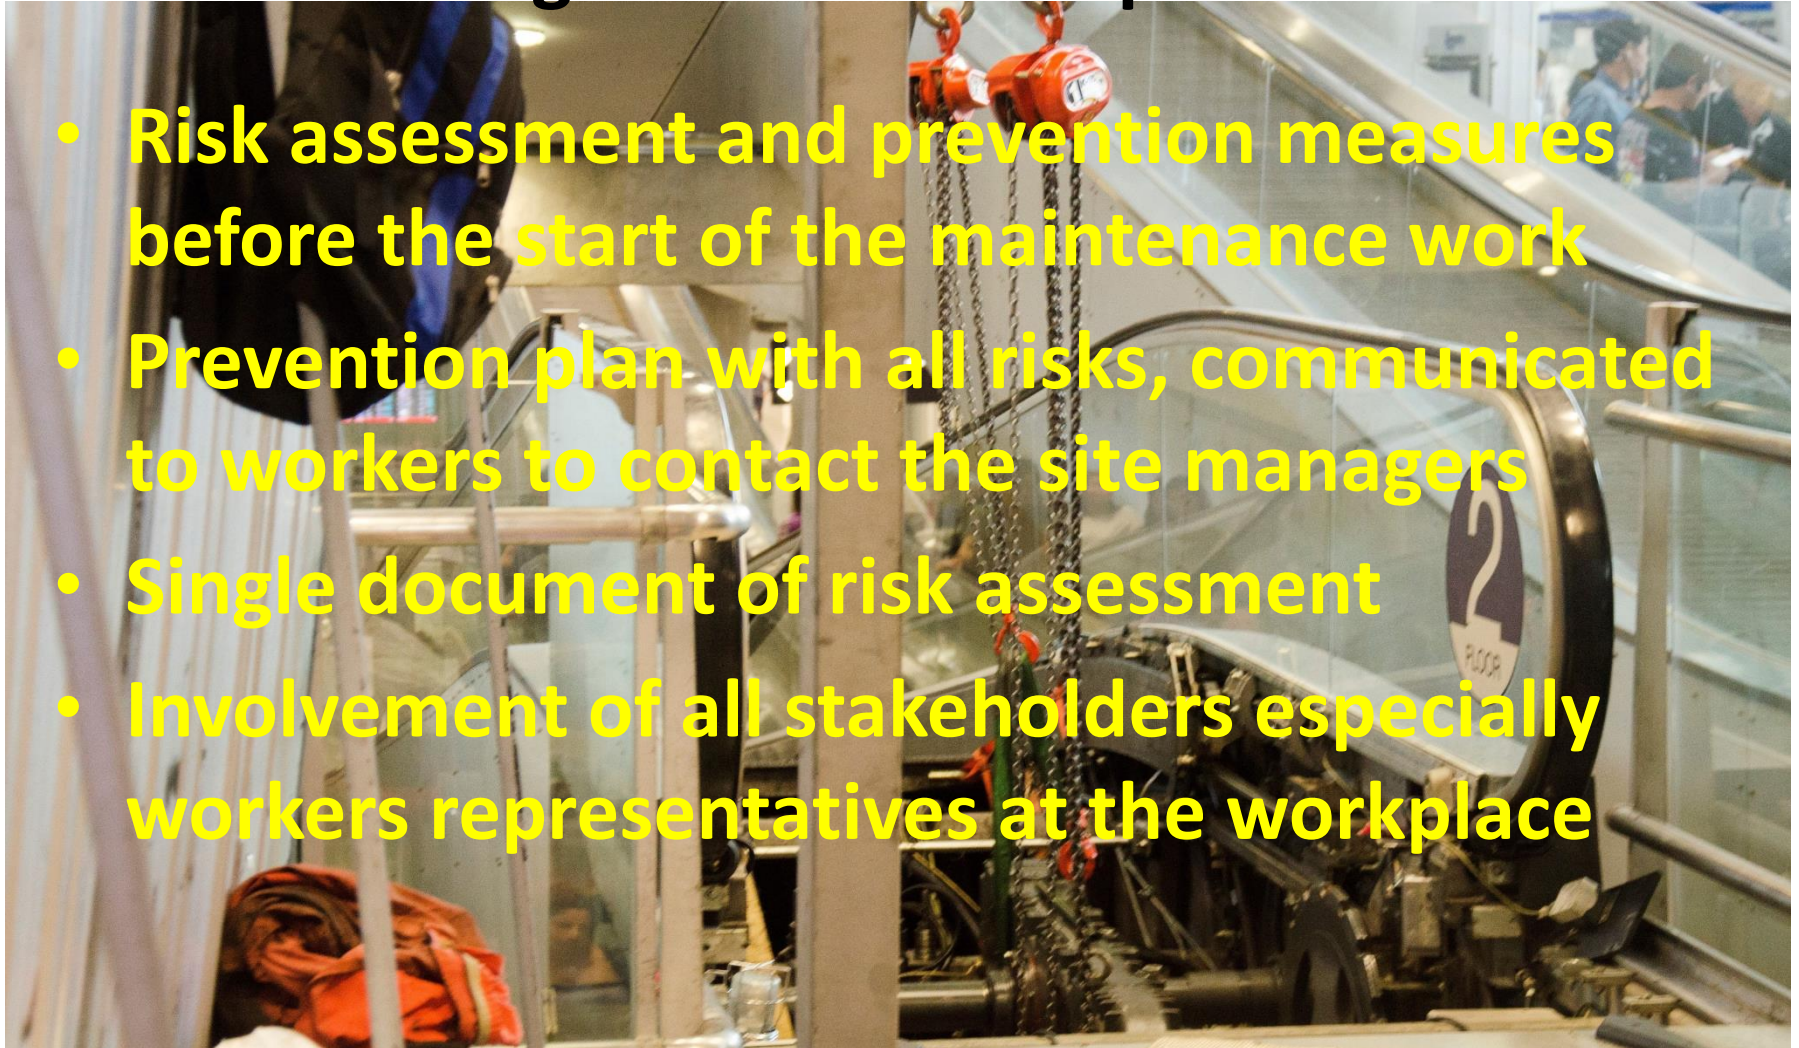

- Risks of falls
- Risks related to handling
- CMR and biological risks
- Mechanical and electrical hazards
- External risks (Co activity ...)
- Occupational diseases (MSDs, Cancers ...)
- Risks related to lack of training and / or formulation of clear instructions

# Risk Assessment in the work on Escalators during maintenance operations

- Risk assessment and prevention measures before the start of the maintenance work
- Prevention plan with all risks, communicated to workers to contact the site managers
- Single document of risk assessment
- Involvement of all stakeholders especially workers representatives at the workplace

# Risk Assessment in the work on Escalators during maintenance operations

An accident or  
declared illness  
are lives that will  
be saved
