List of contributors

Ricardo Aláez-Aller is senior lecturer in economics at the Public University of Navarre in Spain. His research focuses on wage differences, the automotive industry and economic policy.

Carlos Gil-Canaleta is lecturer in economics at the Public University of Navarre. His publications include contributions on regional economics and public administration.

Jan Drahokoupil is a senior researcher at the ETUI where he coordinates research on digitalisation and the future of work. His research also covers the political economy of international business, the organisation and strategies of multinational corporations and foreign direct investment.

Matteo Gaddi is a member of the Scientific Committee of the Claudio Sabattini Foundation and a trade union official at CGIL in Reggio Emilia. He carries out research and training activities on the themes of work organisation, new technologies, and economic and industrial policies. Among his recent publications are: ‘Industry 4.0: freer or more exploited?’ (2019) and ‘Automotive and electric mobility’ (2019).

Krzysztof Gwosdz is associate professor in the Institute of Geography and Spatial Management of Jagiellonian University in Kraków. His research interests are focused on issues of local and regional development, foreign direct investment, the social and economic problems of urban areas, and the restructuring and regeneration of old industrial towns and regions.

Agnieszka Świgost-Kapocsi is assistant professor at Jagiellonian University. Her research is focused on regional and local development with a particular emphasis on the role of women. She is additionally interested in industrial cities, urban geography and social participation (local initiatives and innovations).

Arkadiusz Kocaj is a researcher in the Institute of Geography and Spatial Management of Jagiellonian University. His research agenda focuses on economic geography, urban revitalisation and the geography of manufacturing and traditional industries. He is now working mostly on medium-tech industries (domestic appliances and the possibilities for upgrading in semi-peripheral countries) and the fashion industry (its relationship with sustainability growth).

Juan-Carlos Longas-Garcia is senior lecturer in economics at the Public University of Navarre. His research interests are the automotive industry, regional economics and policy, wage differences and industrial organisation.
Monika Martišková is a researcher at the Central European Labour Studies Institute (CELSI) in Bratislava, Slovakia, and a PhD candidate in the Department of Social Geography and Regional Development of Charles University in Prague, Czechia. Her research interests lie in working conditions and industrial relations in the automotive sector in CEE countries.

Grzegorz Micek is associate professor in the Institute of Geography and Spatial Management of Jagiellonian University. Currently, he heads a research project funded by the Polish National Science Centre on the local impact of co-working spaces. He participated in several EU projects (including the 6th FP project on the delocalisation of labour-intensive industries). He is a Fellow of the Regional Studies Association.

Pamela Meil is a sociologist of work and a senior research fellow at the Institute for Social Science Research (ISF München). Her current research includes the impact of work organisation and skill on hybrid value added systems, the development of a European perspective on work and employment conditions for slash workers and the effects of Industry 4.0 and digital transformation on value chains.

Agnieszka Sobala-Gwosdz is associate professor in the Institute of Technical Engineering at the Bronislaw Markiewicz State Higher School of Technology and Economics in Jaroslaw and a senior researcher in the Institute of Urban and Regional Development. Her research interests cover issues of local and regional development and she has undertaken research mainly in peripheral and frontier regions, especially in southeastern Poland. She focuses particularly on the growth poles theory, foreign direct investment and urban regeneration.

Andrea Szalavetz works as research advisor at the Institute of World Economics, Budapest. Her main research fields include the economics of innovation, digital transformation, Industry 4.0 and global value chains. Her publications are available at www.szalavetz.com.

Miren Ullibarri-Arce is lecturer in economics at the Public University of Navarre in Spain. Her main research interest is wage differences, with a particular stress on the gender wage gap.
