List of contributors

**Jérôme Creel** is Director of the Research Department at OFCE (Sciences Po), Paris, and Associate Professor of Economics at ESCP Business School. He has published numerous articles and (co-)edited several books on European economics. He also participates regularly as an expert for the European Parliament Economic and Monetary Affairs Committee.

**Béla Galgóczi** has been senior researcher at the European Trade Union Institute, Brussels, since 2003, working on capital and labour mobility in the EU. His current research focus is the just transition towards a carbon neutral economy with a focus on fair labour market transitions in carbon intensive sectors and regions.

**Maciej J. Grodzicki** is an economist at Jagiellonian University in Kraków and a member of the board of the Polish Economic Network. He conducts research on the international political economy, global supply chains and the economics of the commons, including forests, and seeks solutions for a sustainable and just economy in the spirit of degrowth.

**Wilfried Gschwandtner** is currently working as an external employee on behalf of Arbeiterkammer Wien (Chamber of Labour Vienna). During the last year, his research has centred on inflation and counter-inflationary policy.

**Michał Możdżeń** holds a PhD in economics and works as an assistant professor at Krakow University of Economics. His research focuses on political economy, macroeconomics, fiscal policy, public administration and labour market issues in central and east European countries, with a particular emphasis on Poland.

**Leopoldo Nascia** is Senior Researcher at the Italian National Institute of Statistics and has been an economic adviser to the Minister of Education and Research. He conducts research on industrial policy, sustainability, innovation and business.

**Mario Pianta** is Professor of Economic Policy at Scuola Normale Superiore, Faculty of Political and Social Sciences, Florence. He is co-chief editor of the journal Structural Change and Economic Dynamics (Elsevier) and President of the Società Italiana di Economia, the professional association of Italian economists.

**Christos Pierros** has been a researcher at the Labour Institute of the General Confederation of Greek Workers (INE GSEE) since 2015. His research focuses on the macro-financial state of the Greek economy. Additionally, he is a postdoctoral researcher at the National and Kapodistrian University of Athens with a focus on economic growth, international competitiveness and financial stability.
Mathieu Plane is Deputy Director of the Analysis and Forecasting Department at OFCE, the Research Centre in Economics of Sciences Po, Paris. He is in charge of economic forecasts for the French economy and works on economic policy issues. He teaches at Sciences Po Paris and at La Sorbonne University. He was, in 2013-14, economic advisor to the Minister of Economy, Industry and the Digital Sector.

Tamara Premrov is an economist in the Economics Department of Arbeiterkammer Wien (Chamber of Labour Vienna) and a lecturer at Vienna University of Economics and Business. Her thematic focus lies on fiscal policy and the welfare state.

Raul Sampognaro is an economics researcher at OFCE, Sciences Po, Paris. His main areas of specialisation are fiscal policy in the euro area and public finance. He has also published articles on the evolution of the French social protection system and on inequalities.

Giuseppe Simone holds a PhD in Economics from the University of Tuscany (Siena, Firenze, Pisa) and has obtained a postdoctoral position at the University of Bologna. His research interests include political economy, structural change and innovation dynamics.

Aleksander Szpor has over 15 years of experience in Polish think tanks and is currently Lead Consultant in Ecorys Polska responsible for climate and energy policies. His main research areas are the just transition in mining and energy intensive industries, and innovation systems.

Sotiria Theodoropoulou is a senior researcher and Head of the European Economic, Employment and Social Policies Unit at the ETUI. Her recent research has focused on the interplay between EU socioeconomic governance and national economic performance, as well as on labour market and social policies in Europe, national responses to inflation and the integration of green and social policies in the EU’s European Green Deal.

Jorge Uxó is Associate Professor in the Department of Applied, Public and Political Economics at Complutense University of Madrid. His main lines of research are applied macroeconomics, with particular reference to the euro area and Spain, fiscal policy, post-Keynesian models of demand-led growth, and wage and employment policies. In recent years, his work has focused on the economic policies applied in Spain and the euro area, along with their distributional and social implications, and the proposal of alternative macroeconomic policies, especially fiscal ones. In recent years, he has published numerous articles on these issues in scientific journals and has co-authored five books.

Andrew Watt has been Head of the European Economic Policy Unit of the Macroeconomic Policy Institute (IMK) since 2012. Prior to that he was senior researcher at the ETUI. He specialises in European economic governance and comparative European political economy. A recent focus is industrial policy and the quest for an EU endowed with 'strategic autonomy'.
